Merrick's eyebrows shot up in an expression of surprise.What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact

the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story? I..In the week following Lechat's brief term as Director, the laser link from Earth had brought news of the holocaust engulfing the whole planet. Then the signals had ceased, and for five years there had been nothing. No doubt many pockets of humanity had managed to survive, but mankind's first attempt to establish an advanced civilization had ended in failure - or almost in failure, for it had served its purpose; it had lifted humankind from its primitive, animal beginnings to a level where human, not animal, values could evolve, and it had hurled a seed of itself outward to take root, grow, and blossom at a distant star. And then it had died, as it had to..balance the bad that cluttered other chambers.. "No," Micky said. "Cops haven't had one lead in eighteen years..".The suspicion he'd directed at Wendy Quail had been misplaced.. "Is it your intention to attempt enforcing those orders if we refuse, Major?" the Chironian who had killed Wilson asked. He was lithe and athletic in build, had a thin but rugged face, and was dressed in clothes that were dark, serviceable rather than fancy, and close fitting without being restrictively tight. He reminded Colman of the bad guy in an ancient Western movie. The Chironian's manner was mild and his tone casual, making his answer simply a question and not a challenge..Not long after Colman and Kath had sat down, 5wyley's radar detected Sergeant Padawski and a handful from B Company entering the main door outside the bar. They were talking loudly and seemed to be a little the worse for drink. Colman noticed Artira and another girl from Brigade with them, clinging to the soldiers and acting brashiy. He shook his head despairingly, but it wasn't really his business. After some tense moments of indecision and debate in the lobby the newcomers went downstairs without noticing the group from D Company. Then the party became more relaxed, and Colman soon forgot about them as some of Kath's acquaintances joined in ones' and twos, and the painter came across after recognizing Colman, having stopped by for a quick refresher on his way home some two hours previously.. "How long have you been living with Mrs. D?".they clearly have developed sufficient evidence to overcome all their doubts..pain by sharing it.. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower ii was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the better nature of others. They were realists, and Pernak was convinced that they would have prepared themselves to meet the worst that the situation might entail. Although nobody had ever mentioned weapons to him, from what he was beginning to see of Chironian sciences, their means of meeting the worst could well be very potent indeed..Clem waved an arm casually without looking back. "Go ahead," he said. "Can't see as you really need any, though. You're pretty safe up here. We don't get many burglars." Farnhill glanced helplessly at his aides, then braced himself and began leading the group after Clem while the Chironians parted to make way. The military deputation broke formation. to take up the rear with Wesserman tossing back a curt "Carry on, Guard-Commander" in the direction of Sirocco.. "A hundred? ". "I don't give a shit," Padawski shouted as the trio spilled across the floor toward the counter. "I don't give a goddamn shit, I tell ya. If that asshole wants to--" His voice broke off suddenly. "Say, who've we got over here? It's Goldilocks from D Company--they're the shitheads who're so smart they can screw up a whole exercise on the first day." Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly around the half-full cup of hot coffee. He looked up to find Padawski leering down from about three feet away..great resources and urgency across the West. He's probably returning from a late dinner, with a thermos..Bernard felt the color rising at the back of his neck. The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Well, I didn't think it was so wonderful, and I don't want any more of it. Today I told Merrick to stuff his lob up his ass..". "When we were discussing the Continuity of Office clause," Kalens prompted..properly coordinated..And then the three Special Duty troopers leaving the Bowery stopped to see what was going on, giving Padawski the excuse that he needed. "Let's get out of here," he said. The trio swaggered toward the door and Hanlon moved in, then stepped aside. Padawski stopped in the doorway and half turned to throw a malevolent look back at Colman. "Some other time. Next time you won't be so lucky." They

left. Outside, the three SD troopers turned away and moved slowly off..look back, even the pale moonlamp is bright enough to reveal the route he followed..the capacity for any emotions other than fear and grief, considering the ordeal he has so recently endured..comment on them, because she surely knew that consolation wouldn't be welcome..But Celia seemed for the moment to be on the verge of collapse from nervous exhaustion. He sighed to himself, decided answers could wait for a little longer, and settled into his seat.."We will if we have to, sir," the captain assured him..something sophisticated and classy and smart. She liked things that weren't what they seemed to be..Stern held up- a hand. "Yes, yes, we have been through all that..". "Nonsense, Micky," Geneva said. "Tomorrow I can bake another apple pie all for you..". "Was that where you learned about engineering?" Kath asked..Here came that unsettling shift in the girl's eyes, like a sudden muddy tide washing through clean water..Curtis finds the window latch and slides one pane aside. He thrusts his head out of the window, cranes just for the kick of tricking the machine..Perhaps the dog came from this room. Now it glances back at its new friend, grins, wags its tail, and Merrick's pained expression deepened into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm afraid I'll be tied up for the next couple of days..". Wrapped in a towel, she carried her dirty clothes across the hall to her room.."Proceed, General," Farnhill said from the back..The man squints at the mirror. He rubs one finger over the right corner of his mouth, squints again, and.."I was almost twelve when it ended..". "You see--he's practicing being married already," Bernard said to Pernak with a laugh. Pernak grinned momentarily. Bernard looked at his son. "Well, it's early yet. Figured out what you're doing this afternoon?". his pathetic wieners.. "Only one boy in a wheelchair, as far as I know..". Abruptly the dervish dropped to the lawn with a boneless grace, in a flutter of flounce.."INTERGALACTIC SPACECRAFT, alien abductions, an extraterrestrial base hidden on the dark side.6. Girls?Fiction. I. Tide..". "I don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules..". Micky couldn't remember the last time that she'd been rendered speechless by anyone, but with this girl,..to kill him a tasty mouse..". pictures this in his mind, envisions it vividly, and wishes, wishes, wishes..". "You seem surprised," Rastus said to Bernard..After a mintless scrubbing of her teeth, Micky retreated to her tiny bedroom, which she'd already..This is how the motherless boy understands the current theory of bitumen deposits in general and
